## SHOVEL CABLE LIFT

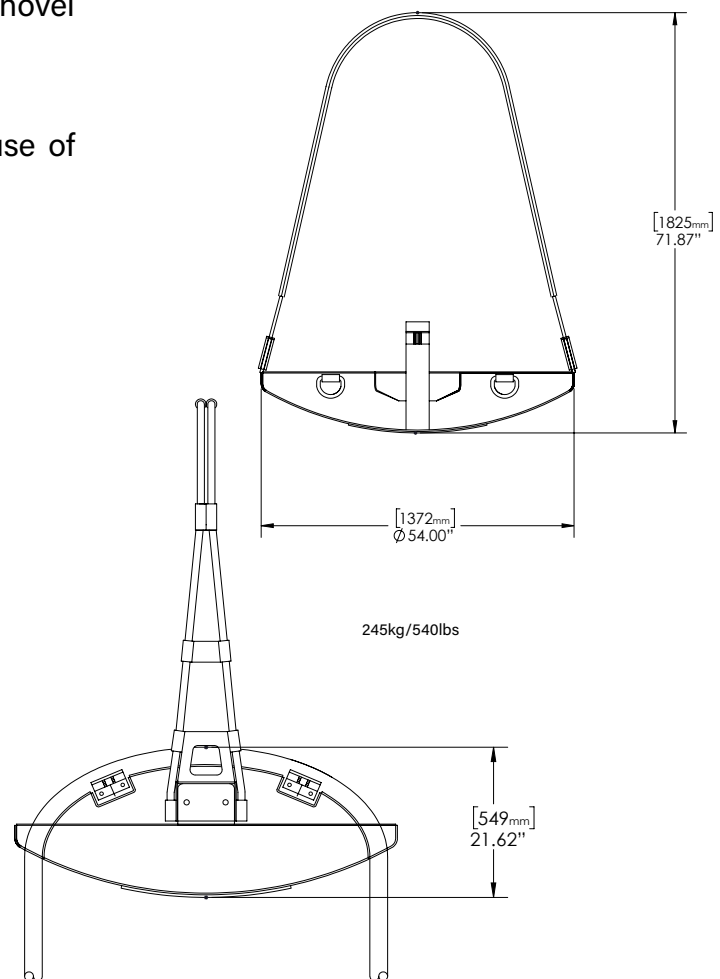

### SHOVEL CABLE LIFT

A safe, innovative approach to relocating trailing cables using a shovel instead of multiple personnel. The Shovel Cable Lift reduces the amount of time spent moving cable, thus reducing shovel operation down time.

### FEATURES

- 5,000lb load capacity
- Integrated mounting brackets to safely secure cable to cable lift
- Innovative design to hold and relocate cable without causing damage which would cause expensive shovel operation delays
- Manufactured with long lasting, durable materials
- Fast & safe way to move cable in pit without the use of multiple personnel, thus saving time
