

CABLE PROTECTION STRAIN RELIEF CLAMPS

STRAIN RELIEF CLAMPS

Patton & Cooke's two types of strain relief clamps eliminate strain on the cable connections at the coupler/enclosure interface on electric shovels, drills, LHD's, jumbos, junction boxes or cable supports. Strain relief clamps support cables in vertical shaft and pole suspension applications.

FEATURES:

- Eliminates strain on the cable connections at the coupler/enclosure interface on electric shovels, drills, LHD's, jumbos, junction boxes or cable supports
- Supports a cable in vertical shaft and pole suspension applications
- Made of thick, black polyurethane and using galvanized hardware and wire rope, the strain relief clamp is designed to prevent cable jacket damage and to withstand the tough use typical in mining, construction and utility applications
- The strain relief clamp is available in twelve sizes, covering a cable diameter range of 0.625-3.625" (16-92 mm). Larger sizes are available on request

STANDARD	
Catalogue Number	Cable Diameter Range
11W-010-A	0.625" - 0.875"
